Perfect Partitioning Solutions

## DEKO - Perfect Partitioning Solutions

DEKO is one of the leading companies in Europe producing and supplying demountable system as well as glazed partitioning solutions and matching door systems. It is our strategy and goal to manufacture flexible products based on prefabricated standardised components of high quality and design. Products that comply with statutory requirements with regard to fire resistance, sound reduction as well as customer requirements in terms of the environment, functionality, aesthetics, and quality.

Product development takes place at our head office in Denmark. In Denmark we work both as a producer and as a contractor. The knowledge and experience from our contracting businesses is used to develop new and innovative products.

Our working process in these areas is based on four key aspects: Insight, Inspiration, Innovation, and Implementation.

This working process combined with our 40 years of experience has made it possible for us to be a state-of-the-art company.

Being an international product distributor, it is very important to ensure that our focus on the four key aspects is maintained not only in our work nationally, but also in the work of our many distributors in 35 countries worldwide.

In order to supply high quality products, we base our product development on our own contracting experience as well as the experience of our partners. We co-operate closely with our international distributors as well as architects, contractors, and end users. In that way, it is possible for us to obtain the necessary inspiration and insight in the implementation and function of our products. The insight and inspiration enables us to maintain an innovative range of products that complies with national and international standards.

DEKO is financially well-consolidated. That allows us to always have a large production and stock capacity making it possible for us to offer our international distributors and customers fast delivery of the entire product range. It also allows our production department to work with the most modern facilities enabling us to manufacture a product range always of the highest quality. Finally, it has resulted in the Dun and Bradstreet AAA rating.

As a service to our distributors, our export department is staffed with highly experienced and competent employees ready to assist our distributors in any way. They are dedicated to assisting and supporting the distributor network. This includes support in sales and marketing, assistance regarding the different phases of the implementation process, and, needless to say, updated information from the development department.

DEKO and DEKO distributors work according to specified terms and conditions defined in a contract signed by both parties. This agreement provides security for DEKO, DEKO distributors and ultimately for customers and end users: DEKO distributors agree to participate in a number of courses and to assure our company values in their distribution; DEKO agrees to deliver products that comply with requirements as regards the environment, functionality, aesthetics, and quality.

DEKO partitions ltd of denmark was established in 1970 and presently has approximately 300 employees. DEKO is the leading producer of demountable, glazed, and folding partitions in Scandinavia and distributes its product range to more than 35 countries worldwide including Europe, Africa, and Asia in co-operation with established local distributors.
